Address: 725 W SR 434 Unit H, LONGWOOD, FL 32750

ABOUT

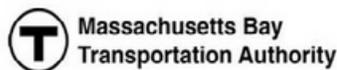

PCBA King has a staff of experts well versed in all aspects of the PCBA industry, from fulfillment to manufacturing and fabrication. We pride ourselves on delivering amazing value to our customers with professional care throughout every phase of the process. From high quality design and competitively sourced components, board printing and assembly, to testing and integration, PCBA King brings a detail oriented approach to every customer's project.

We offer a full line of essential components and pre-designed board configurations that meet every need of our customers. Our diversified supply chains utilize vetted, accredited local and international suppliers, allowing us to adapt quickly and accurately to the global market.

PCBA King's customer care team is dedicated to providing an excellent buying experience through transparency and individual satisfaction from the first day of your relationship with us. Our representatives are entirely US based and have extensive experience in navigating concerns specific to the industry.

Some of the most successful companies in the world trust PCBA King to help design and manufacture their products— from UL Control Panels to Printed Circuit Boards. Some of our partners include:

CAPABILITY

SMT

- n 01005 Passive Device
- n BGA & Micro BGA placement

Thru-Hole Assembly

Wave Solder

Inventory Management System

- n Segregated materials management system
- n Offline job set up and Quality check
- n Supplier qualification and tracking
